PRODUCT CATALOG

CORPORATE PROFILE

Adopting the principles of quality, trust, and sustainable production, our company carries out production and marketing activities in the fields of polyester yarn, sack closing yarns, and industrial yarns.

Always prioritizing customer satisfaction, our company offers high-quality products to its domestic and international business partners with its modern production approach and sectoral experience. Quality control applications are carried out at every stage of our production processes, and our products are prepared in accordance with national and international standards under the guarantee of ISO quality certificates and delivered to our customers.

Closely following the changes in the sector, our company aims to continuously increase efficiency, quality, and customer satisfaction by integrating technological developments into its production processes.

POLYESTER COLORED AND WHITE YARNS

Produced using high-quality raw materials, our polyester yarns are offered with various numbering and color options suitable for the needs of different sectors.

Product Features

- High tenacity
- Homogeneous structure
- Resistance to abrasion
- Long-lasting use
- Vibrant and lasting colors
- High performance

Areas of Use

- Textile sector
- Weaving industry
- Packaging sector
- Home textiles
- Technical textiles
- Industrial applications

SACK CLOSING YARNS

Our sack closing yarns offer safe and strong sewing solutions for the packaging of flour, feed, pulses, fertilizer, seeds, coal, and various industrial products.
With 100% polyester 12/4, 12/5, and trolen varieties, suitable for every sector and every machine type, they are prepared as:

200 gr white and colored small bobbins for portable sewing machines

1 kg – 1.2 kg white and colored large bobbins for stationary sewing machines

3 kg white and colored super bobbins for stationary sewing machines, and optional 5 kg jumbo bobbins

Product Advantages

- High tenacity
- Smooth operation in machines
- Strong and neat seams
- Resistance to breaking
- High production efficiency
- Knotless and seamless
- Superior resistance against sack bursting

Areas of Use

- Flour mills & Feed production facilities
- Pulse packaging facilities
- Agricultural product manufacturers
- Fertilizer factories & Chemical industry
- Industrial packaging sector
- Coal packaging

INDUSTRIAL YARNS

We offer the high-performance yarn solutions needed by the industrial sector to our customers with our understanding of quality and reliability.

Features

- Superior durability
- High production standard
- Production suitable for different areas of use
- Custom order options
- Continuous quality control

Areas of Use

- Packaging industry
- Agricultural sector
- Textile industry
- Technical textiles
- Industrial production
- Automotive sub-industry

OUR QUALITY POLICY

Quality is one of the most important values of our company.
Thanks to the quality control processes we apply at every stage of production, we offer reliable, durable, and high-performance products to our customers.

Our understanding of quality is built on the principles of;

✓ Continuous improvement
✓ Customer satisfaction
✓ Reliable production
✓ Timely delivery
✓ Sustainable growth

WHY CHOOSE US?

- **Experience:** We offer the right solutions to our customers with our knowledge and experience in the sector.
- **Quality:** Every product is produced in accordance with quality standards.
- **Reliability:** We establish long-term business partnerships with our customers.
- **Fast Delivery:** We ensure that orders are delivered on time and complete.
- **Competitive Prices:** We bring quality together with economical solutions.
- **Customer-Oriented Service:** We develop customized solutions for the needs of each customer.
